Senior Program Leader

AI Strategy & Operations • Enterprise Transformation • PMO & Operating Model Leadership •
Governance & Portfolio Planning • Product & Technology Delivery

Summary

Enterprise transformation and AI strategy leader with extensive experience driving operating model transformation, PMO leadership, governance, portfolio planning, and enterprise program delivery across Fortune 100 organizations, including Intuit, Oracle, Intel, Visa, and Wells Fargo.

Proven track record translating business strategy into scalable execution through organizational alignment, change management, executive stakeholder engagement, and cross-functional leadership. Expertise spans AI adoption, cloud transformation, SaaS platforms, product operations, release governance, and enterprise-wide business transformation initiatives supporting global teams and complex technology ecosystems.

Highlights

- Led governance, planning, and execution alignment across 40+ global engineering organizations supporting Oracle Fusion Applications.
- Directed enterprise adoption of AI-enabled portfolio planning and roadmapping platforms across Product, Engineering, TPM, and Business Operations organizations.
- Built and scaled PMOs, governance frameworks, operating models, and delivery organizations supporting enterprise growth and transformation.
- Partnered with executive leadership to drive portfolio prioritization, organizational change, strategic planning, and enterprise execution.
- Led cloud modernization, release governance, compliance, and operational transformation initiatives supporting large-scale SaaS platforms.
- Delivered enterprise transformation programs across technology, fintech, healthcare, consumer products, and enterprise software organizations.

Experience
